### Definitions

Allocation by currency	Allocation by currency is generally reported on the basis of the denomination currency of the financial instruments and not of the risk currency of the underlying securities. Differences between the reported denomination currency of the financial instruments and the economic currency exposure may therefore arise.
Asset allocation	The asset allocation shows how much of the total portfolio is invested in the different asset classes (i.e. cash, equity, bonds, alternative investments).
Benchmark	The Benchmark is an index used as a reference to evaluate the performance of a portfolio.
Beta	A measure of the systematic risk of an asset when compared to a market or benchmark. Systematic risk means it cannot be diversified away by adding other assets.
Credit rating	Credit ratings always reflect the lowest of the current ratings provided from rating agencies such as Standard & Poor's, Moody's, Fitch and other similar rating agencies.
Fund splitting	Funds are splitted according to their underlyings into asset classes and currency. Data provider is Finance-Doc Multi Management AG.
Gross result / return	Result / Return before management & administration fees and taxes
Information ratio	Active return (alpha) divided by the tracking error. Indicates if deviating from the benchmark was worthwhile.
Jensen's Alpha	The difference when comparing the excess return of a portfolio to the risk (beta) adjusted excess return of the benchmark.
Leeways	The leeways are spectrums for the minimum and maximum allocation to one specific asset class or currency.
Maturity	The maturity is the date at which a bond expires.
Metal positions	Metal positions are always valued at the value of the underlying metal.
Modified duration	The modified duration shows a bond's change in value in respect of fluctuations of the market interest rates.
Net net result / return	Result / Return excluding reclaimable withholding tax
Net result / return	Result / Return after management, administration and transaction fees
Performance	TWR (Time Weighted Return) is a return calculation method that eliminates distorting effects of in- and outflows.
Performance contribution	The performance contribution shows the influence of an asset class or a single position on the total portfolio performance.
Portfolio risk / volatility	The portfolio risk is the standard deviation of the portfolio's performance.
Pro-memoria positions	Pro-memoria positions are not included in the portfolio value and are not part of any performance, return or profit / loss calculation.
Reclaimable taxes	The amount of withholding taxes which can be effectively reclaimed depends on each client's individual tax situation. It may therefore vary from the amounts shown in the reports.
Reference currency	The reference currency is valuation currency of the instrument respectively the security currency.
Reporting currency	The reporting currency is the one in which the report is produced.
Result	Profit / loss in reporting currency
Risk currency	The risk currency is the currency to which an instrument has the highest exposure.
Sharpe ratio	The sharpe ratio measures the excess return (return above the risk-free rate) relative to risk (standard deviation of excess return).
Tracking error	Standard deviation of the difference between portfolio returns and benchmark returns.

### Abbreviations

CNH	Offshore renminbi
P/L	Profit / Loss
ROA	Return on assets
Q	Quarter
Y	Year
-	+ / - 1000%
Ded. Withh.Tax	Deducted withholding tax

### Foreign exchange rates used for valuation

1	USD	0.719261	GBP
1	USD	0.843312	EUR
1	USD	0.906307	CHF
1	USD	6.272889	DKK

Please note: in the transactions segment, the FX rates used for converting into the report currency are the ones as of the time of trade.

### Definitions

---

Treynor ratio	Compares the excess return (return above the risk-free rate) earned to the systematic risk. Do not compare portfolios with different benchmarks.
Yield to maturity	The total return anticipated on a bond if it is held until the end of its lifetime.

Figures in graphs are rounded off to not more than two places after the decimal point.

### Important legal information

---

This report replaces all previous reports with same «as per date».

The database may contain simulations and may not list all products with regard to possible liabilities (e.g. loans). If no current market value for a financial product is shown in this statement, this may be an indication of the product's illiquidity.

Some of the data on which this statement is based was provided by external custodian banks, the client and third parties. This data may vary for the indicated stock market prices or valuations of financial products or the indicated cash amounts within the statement itself or compared with other statements due to market-related and system-related differences. The valuations of individual assets are based on prices and values from standard market information sources. If no official or regular price or value is available, an approximate valuation may be used. The prices shown do not correspond to tax prices and can therefore not be used for tax purposes. Please check the statement and inform us in writing within one month in the event of any discrepancies. Upon expiration of this period, the statement shall be regarded as approved.

This document may contain information obtained from third parties, including ratings from rating agencies such as Standard & Poor's, Moody's, Fitch and other similar rating agencies. Reproduction and distribution of third-party content in any form is prohibited except with the prior written permission of the related third-party. Third-party content providers do not guarantee the accuracy, completeness, timeliness or availability of any information, including ratings, and are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Third-party content providers shall not be liable for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the market value of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice. Please contact your relationship manager for any further information you may require.

### Remunerations

Unless otherwise expressly agreed, Bank Julius Baer & Co. Ltd. («Bank») may receive payments or other pecuniary benefits of any kind (hereinafter «remunerations») from third parties including companies affiliated with the Bank in connection with the distribution of financial products (see clause 21 of the General Banking Conditions («GBC»)). An information sheet enclosed with the GBC as well as the annual portfolio statements contain detailed information on the nature and amount of remunerations of this kind.
